# Viktor Yevtushenko

## Software Developer | Innovative Thinker | Multidisciplinary Engineer

Experienced iOS Developer with 5+ years of professional experience, focused on building scalable and high-performance applications. Skilled in Swift, Objective-C, SwiftUI, UIKit, Core Data, and ARKit, with strong expertise in MVC, MVVM, MVP, and VIPER architectures.
Proficient in Apple Wallet, Deep Linking, RESTful APIs, and integrations with Firebase, ArcGIS, and Google Maps. My background in telecommunications and scientific research strengthens my analytical mindset and precision. Passionate about innovation, learning, and delivering reliable, user-focused digital solutions.

## WORK EXPERIENCE

**November 2024 – present**

German course in Heilsarmee LernPunkt, Bern
BINplus, Vocational Integration + Language Support, ECAP, Bern

**July 2023 – November 2024**

Volunteer — Refugee Camp Support Assistant, Bern, Switzerland

**July 2018 – May 2023**

**Software iOS developer:**

- Delivered multilingual iOS applications with RTL (Arabic) support for SPL Online and Locator, ensuring seamless user experiences
- Optimized API performance for Imployable, Freespoke, and Uncover, reducing load times and improving responsiveness
- Implemented advanced camera and 3D features in Vuable, and developed the JOIN Stories iOS SDK for seamless interactive content integration
- Integrated Apple Wallet, Deep Linking, Universal Links (KAI KeyboardAI, SPL Online, Movement Vault) to boost connectivity and engagement
- Built robust custom networking layers and real-time video/audio streaming (AgoraRtcKit, TwilioVideo) for projects like Locator, LinguaMoment, KAI KeyboardAI, Legion, and Movement Vault

**January 2017 – May 2017**

**Telecommunications Installation & Commissioning Technician:**

- Installed and commissioned wired telephone equipment for subscriber networks
- Assembled and installed all types of telecommunication splices for cable connections ranging from single pairs up to 500 pairs
- Performed cable cross-connections in distribution cabinets for accurate traffic routing
- Operated Tyco and 3M machines for simultaneous connection of modular connectors (up to 25 pairs)
- Troubleshooted and repaired subscriber telephone networks
- Led a team of 4 technicians, planning and coordinating daily tasks

**July 2016 – January 2017**

**Mobile Communication Equipment Installer:**

- Installation and commissioning of mobile communication equipment on high-altitude structures (towers)
- Configuration and activation of base stations, including testing and operational launch
- Conducting alignment and calibration of antennas to ensure optimal coverage and signal quality
- Adherence to safety protocols while working at height; proficient use of industrial climbing equipment

## UNIVERSITY EXPERIENCE

**September 2013 – Juni 2016**

- Operated vacuum equipment for material deposition and research
- Designed and developed control boards for temperature regulation and monitoring
- Deposited CdS thin films using Close-Spaced Sublimation (CSS) in a vacuum system for solar panel applications
- Analyzed crystalline structure of materials by X-Ray Diffraction (XRD)
- Studied optical properties of films using UV-Vis Spectrophotometry
- Synthesized porous anodic aluminum oxide (AAO) with ordered pore structure
- Investigated aluminum oxide morphology using Scanning Tunneling Microscopy (STM)
- Optimized fabrication methods to improve aluminum oxide quality

## KEY SKILLS

**Software Development**

- **Languages/Architectures:** Swift, Objective-C/MVC, MVVM, MVP.
- **Frameworks and Libraries:** UIKit, SwiftUI, Firebase and etc.
- **Platforms:** Git, SourceTree, GitHub, Canvas, Zeplin, Figma, Trello, Asana, Jira, Notion.
- **Specialized Features:** Apple Wallet, Deep Linking, Universal Links, In-App Purchases, Push Notifications, AR/VR Integration, Encryption.
- **Networking:** RESTful APIs, GraphQL, JSON, URLSession, XML.
- **Testing and Debugging:** Unit Testing, UI Testing, Performance Optimization.

**Telecommunications & Hardware**

- **Equipment:** Wired/Mobile Telecom Equipment, Base Stations, Antennas
- **Techniques:** Cable Splicing & Cross-connection, Antenna Alignment, Modular Connector Assembly
- **Safety:** Industrial Climbing, High-altitude Safety Procedures
- **Management:** Troubleshooting, Field Technician Leadership, Daily Task Planning

**Scientific Research | Laboratory Skills**

- **Equipment:** Vacuum Deposition Systems (CSS), Temperature Control Boards
- **Analysis Methods:** XRD, UV-Vis Spectrophotometry, STM
- **Materials:** CdS Thin Films, Porous Anodic Aluminum Oxide (AAO)
- **Processes:** Material Deposition & Optimization, Surface Morphology Analysis

**Interests & Hobbies**

- **Technical & Creative Skills:** AVR microcontroller programming (Assembler)
- **Mind & Strategy:** Chess, volleyball.
- **Physical Activities:** Rock climbing, hiking, swimming, traveling.
- **Lifestyle & Exploration:** Purposeful explorer of places, ideas, and histories — fascinated by the intersection of science, culture, and human experience.

## EDUCATION

**Bachelor of Micro and Nanoelectronics**
National Technical University "Kharkiv Polytechnic Institute"
Ukraine: 2010 – 2016

## SPARACHEN

| | |
|---|---|
| Ukrainian | Native |
| English | B2 |
| German | A2 |
| Polish | A1 |

## CONTACTS

| | |
|---|---|
| Mobile | +41 79 477 7764 |
| Email | 48tievtushenko@gmail.com |
| Address | Rosenstrasse 12, 2562 Port, Bern, Switzerland |

## CERTIFICATIONS

**Huawei Certificate – Safety Passport:**
Huawei Technologies, issued 01.01.2018

**Competence in Electrical Installations (up to 1000V):**
Training Complex "Slavutych", issued 21.06.2016

**Completion in Fire Safety Training:**
Training Complex "Slavutych", issued 17.06.2016

**Performing Gas and Fire Hazardous Works:**
Certificate for Work in Wells, Shafts, Trenches, Excavations, Bunkers, Chambers, Collectors, and Confined Spaces
Training Complex "Slavutych", issued 30.11.2016
